## Administrative Entity - Residential Provider Preparedness Assessment Tool for COVID-19

## Purpose:

This tool is intended for use by the county AE staff in order to ascertain the status of the residential providers within their communities during the COVID-19 response. One of the primary goals of this assessment is to provide **reassurance**, **leadership and stability** within the residential provider communities during these the COVID-19 pandemic. County programs are in a unique position to create y a safety net that serves and protects vulnerable populations, especially individuals with ID/A and their families. We hope you find the guidance within this tool helpful.

This tool and process are unique to COVID-19 pandemic. It is not intended to be utilized within the typical county provider risk management process, or nquality assurance and improvement oversight

The assessment can be conducted on an individual provider basis or as a network engagement activity. The goal will be to engage with the residential providers on a weekly basis. We anticipate that counties will be able to identify those agencies who may present at a <a href="https://example.com/higher-risk">higher risk</a> due to the characteristics of the population they serve, business models, recent licensing or programmatic citations, numbers of people served, etc and prioritize these contacts. Please include life sharing providers within this effort.

In the event, there is an agency who is identified as needing additional support, ODP expects the county to engage with the regional ODP staff, who will remain in contact with ODP senior management and the deputy secretary. If emergency contingency plans are needed, ODP is committed to working with county agencies and providers in order to address these in a timely manner.

This assessment is modeled from one developed by the state Department of Health referred to as "LTCF Preparedness Assessment" for COVID- 19 "

## **Residential Provider Preparedness Assessment for COVID-19**

We recommend the following assessment be conducted on a weekly basis to assist with risk mitigation for residential providers operating within the counties and completed before cases of COVID-19 are identified in your agency if possible. If cases are then identified, this information will be helpful to you and your team and will assist ODP with providing support.

		Notes/Areas for Improvement
Which	of the following situations apply to the agency?	
(Select	all that apply)	
	No cases of COVID-19 currently reported in	
	their community	
	Cases reported in their community	
	Sustained transmission reported in their community	
	Cases identified in their agency (either among Staff or residents)	
	If there are suspected or confirm cases the number of people with potential exposure	
	number of people with potential exposure	
How m	any days supply does the agency have of the	
followi	ng PPE and alcohol-based hand sanitizer (ABHS)?	
•	Facemasks:	
•	N-95 or higher-level respirators:	
•	Isolation gowns:	
•	Eye protection:	
•	Gloves:	
•	ABHS:	
Please	describe any emergency or contingency plans for ill	
	its and/or staff in the event of COVID-19 cases in	
the age	•	
•	Does the agency have a method to ensure that	
	individuals information regarding health and safety is readily available to transport with the individual in the event of an emergency?	
•	There is a cleaning and sanitation protocol in place	
•	There is a process for ongoing regular communication with staff individuals and families	
	especially if there's a suspected or confirm case	
	and if we location becomes necessary

Elements to be assessed	Assessment	Notes/Areas for Improvement
Agency restricts all visitation except certain compassionate care		
situations, such as end of life situations.		
Decisions about visitation during an end life situation are made on a		
case by case basis: Potential visitors are screened prior to entry for		
fever or respiratory symptoms. Those with symptoms are not		
permitted to enter the facility.		
<ul> <li>Visitors that are permitted inside, must wear a facemask while in the building and restrict their visit to the resident's room or other location designated by the facility. They are also reminded to frequently perform hand hygiene.</li> <li>Agency restricts visitors unless medically necessary or within protective services and licensing regulations</li> <li>Agency has sent a communication (e.g., letter, email) to families advising them that no visitors will be allowed in the facility except for certain compassionate care situations, such as end of life situations, and that alternative methods for visitation (e.g., video conferencing) will be facilitated by the agency.</li> </ul>		
Facility has posted signs at entrances to the facility advising that no		
visitors may enter the facility.		
Education, monitoring, and screening of staff		
Elements to be assessed	Assessment	Notes/Areas for Improvement
Agency has provided education and refresher training to staff		
(including consultant personnel) about the following:		
<ul> <li>COVID-19 (e.g., symptoms, how it is transmitted)</li> </ul>		
<ul> <li>Sick leave policies and importance of not reporting or remaining at work when ill</li> </ul>		
<ul> <li>Adherence to recommended IPC practices, including:</li> <li>Hand hygiene,</li> </ul>		
<ul> <li>Selection and use including donning and doffing PPE,</li> </ul>		
<ul> <li>Cleaning and disinfecting environmental surfaces and resident care equipment</li> </ul>		
<ul> <li>Any changes to usual policies/procedures in response to PPE or staffing shortages</li> </ul>		
Facility keeps a list of symptomatic staff.		
Facility screens all staff (including consultant personnel) at the		
beginning of their shift for fever and respiratory symptoms (actively		

takes their temperature and documents absence of shortness of		
·		
breath, new or change in cough, and sore throat).		
If they are ill, they are instructed to put on a facemask and		
return home.		
Non-essential personnel including volunteers and non-essential		
consultant personnel (e.g., barbers) are restricted from entering the		
home.		
Education, monitoring, and screening of residents

		Improvement
Agency has provided education to residents and information		
about the following:		
• COVID 10 (o.g. symptoms have it is transported.)		
COVID-19 (e.g., symptoms, how it is transmitted)      Importance of immediately informing staff if they feel		
<ul> <li>Importance of immediately informing staff if they feel feverish or ill</li> </ul>		
Actions they can take to protect themselves (e.g., hand)		
hygiene, covering their cough, maintaining social		
distancing)		
<ul> <li>Actions the agency is taking to keep them safe (e.g., visitor</li> </ul>		
restrictions, changes in PPE, canceling group activities and		
communal dining)		
<ul> <li>Counseling related to fear and anxiety and available MH</li> </ul>		
tele services		
<ul> <li>Provision of additional behavioral support for individuals</li> </ul>		
struggling with fear, change in routine, anxiety, isolation		
Agency assesses residents for fever and symptoms of respiratory		
infection upon admission and at least daily throughout their stay in		
the facility.		
Residents with suspected respiratory infection are		
immediately placed in appropriate Transmission-Based		
Precautions.		
Long-term care residents with COVID-19 may not show  typical symptoms such as fover or respiratory symptoms.		
typical symptoms such as fever or respiratory symptoms. Atypical symptoms may include: new or worsening malaise,		
new dizziness, diarrhea, or sore throat. Identification of		
these symptoms should prompt isolation and further		
evaluation for COVID-19 if it is circulating in the community.		
Availability of PPE and Other Supplies	<u> </u>	
Elements to be assessed	Assessment	Notes/Areas for
